

Strahinja Cokić

Personal Profile

I'm a self taught frontend developer. I have been working with developers throughout last couple of years and I found out that I love designing and creating beautiful experience for the users!

I have since then worked on my design and frontend skills! I love working with HTML and CSS and I can handle a bunch of JavaScript. I am currently learning React and Redux so that I can level up my skills and be able to work on complex projects. My goal for the future is to become a great frontend developer and I'm eager and ready to learn as much as possible. I am enthusiastic about learning new stuff that will help me become a better developer!

Development Projects

strahinjacokic.com

I made my portfolio website from scratch with pure HTML, CSS, and JavaScript.
