

Strahinja Cokić

Personal Profile

I'm a self-taught front-end developer. I have been working with developers throughout the last couple of years and I realized that I love designing and creating beautiful experiences for the users!

I have since then worked on my design and frontend skills! I love working with HTML and CSS, I can handle a bunch of JavaScript. I am currently learning React and Redux so that I can level up my skills and be able to work on big projects. My goal for the future is to become a great frontend developer and I'm eager and ready to learn as much as possible. I am enthusiastic about learning new stu that will help me become a better developer!

Development Projects

strahinjacokic.com

I made my portfolio website from scratch with pure HTML, CSS, and JavaScript.

Demo

GitHub

Marvel Heroes Cards

Simple React app that uses Marvel's API to render a paginated list of Marvel comic book heroes.

Demo

GitHub

To Do App

Simple to do app built with pure HTML, CSS, and JavaScript that stores tasks to local storage.

Demo

GitHub

Two Player Dice Game

During the JavaScript course, I made a two-player game of dices where the goal is to reach 100 points.

Demo

GitHub

WordPress Projects

pobedimoastmu.rs

I created a brand identity and social media design and built a WordPress website for this NGO.

Live website

digitalnakancelarija.rs

I built a WordPress website to showcase my work related to WordPress website building.

Live website

medana.rs

I built an e-commerce website by using WordPress theme builder with automated emails.
